

# Country Garden Greenhouse

**Grow with Us !**

## **Woolly Lavender**

**One of the most unique and rare varieties we carry, highlighted by bright violet flowers that create a beautiful contrast to its dense white woolly foliage! This variety is commonly found at altitudes over 1000m in the mountains of Spain. Plant in a sheltered sunny spot in well drained alkaline sandy soil, ideally in a raised bed or rock garden as it is prone to root rot if conditions are too wet. Perfect for borders, rock gardens and containers.**

**Bloom time mid-late summer. Height up to 1m.**
