## **Candy Stevia**

*Stevia rebaudiana* 'Candy'

Supersized stevia! The most robust variety of stevia we have seen. The whole plant has a sturdy upright look with strong thick stems and monstrous leaves that can exceed 10cm/4" long and 5cm/2" across. Even when grown in pots the plants reach heights of 90cm/36" or more. Taste is similar to regular stevia.
