

Basil 'Cardinal'

Ocimum basilicum

A stunning basil with large burgundy flower bracts. The leaves can be used like any other sweet basil, but you can also pick the red flower bracts and sprinkle them over salads, egg dishes, soup, etc. for flavour and for colour. With its colour, strong fragrance, and long deep purple stems, this also makes an excellent cut flower. It tolerates heavy cutting well so multiple cuttings are possible. Ht. 75cm/30in.
