Grow with Us—Support the Local Economy

Lavender

Fragrant and beloved by pollinators, lavender thrives in hot, dry conditions. Full sun, well-drained soil

Rosemary

An evergreen shrub with needle-like leaves, great for cooking and attracting bees. Full sun, lean soil, low water needs

Oregano

A perennial herb that prefers dry, nutrient-poor soil and is often used in Mediterranean dishes. Full sun, well-drained soil

Thyme

Versatile and aromatic, thyme attracts various pollinators and has medicinal properties. Full sun, well-drained soil

Savory

Prefers warm, sunny locations and is used in cooking; has two main types: summer and winter savory.

Full sun, dry, nutrient-poor soil Tips for Growing

Ensure good drainage to prevent root rot.
